Summary

Experienced working with teams to produce impactful, leading-edge websites that engage customers and deliver business results. Well-versed in design standards and user preferences.

Knowledgeable Front End Developer adept at creating successful websites that meet customer needs. Specializing in collaborating with customers to gather requirements, produce plans and improve designs for usability and functionality. Fully proficient in HTML, CSS, and javascript, React JS.

Work Experience

Jan 2021 - Present

 **Front-End Developer At Creator-x** (Full-time)

Developed both web applications & websites using React JS.

Worked on:

- Car rental App: Web application that customers can offer their cars for rent or rent a car from the cars shown
- Teaching Qura’n App: A platform that can be used to learn Qura’n-related courses.

My duties include:

- Translation of the UI/UX design wireframes to actual code. Ensure the technical feasibility of UI/UX designs.
- Collaborated with stakeholders during development processes to confirm creative proposals and design best practices.
- Worked in Agile-driven environment to effectively maintain project timelines and utilize available resources.
- Designed and updated layouts to meet usability and performance requirements. Produced responsive websites compatible with multiple browsers.
- Build reusable code and libraries for future use

June 2021 - Present

 **Freelancer**

- Developed Some projects including website for a company that offer services, Programs & certificates, and events for specific audiences.
